

KILO WATT METER PANELS

SINGLE PHASE PANELS

DESCRIPTION

METAL PANELS

Kilo watt meter panels are designed for the safety and easy access to maintenance and meter readings. Built in different sizes and shapes accommodate the needed tasks.

APPLICATIONS

Houses, buildings, factories, and shopping centers.

SPECIFICATIONS

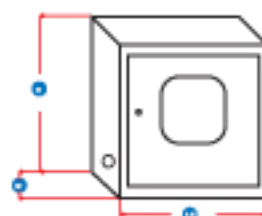

Formed from 0.5 or 0.7 or 1.0 mm thickness of cold rolled steel, coated with electrostatic powder flint gray color. With 20 X 4 mm copper galvanized buss bar except model (1), 6.00 mm copper pvc insulated wire for connecting between bus bars and kilo watt meters. With 8.0mm wood mounted plate for installation and back support.

Availability of construction according to any requested size.
